Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. In view of the appeal brief filed on 8/31/06, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 8-13 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility.

The claimed invention as a whole must be useful and accomplish a practical application. That is, it must produce a "useful, concrete and tangible result." State Street, 149 F.3d at 1373-74, 47 USPQ2d at 1601-02. In the instant application,

applicant merely claims steps and means for supplying a picture signal and a quality indication. There is no "useful, concrete and tangible result" produced.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 6-8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Laub (3,706,843).

Regarding claim 1, Laub discloses a television system showing a step for receiving an analog picture signal and a quality indication signal (driver sampling rate generator 45), and a step of processing the analog picture signal in dependence on the quality indication signal (sampling circuit). The sampling clock meets the claimed quality indication because it determines the quality of the picture being sampled (see col. 5, line 64, to col. 6, line 6). The sampling circuit 14 and filters 42 and 44 together sample and processes the analog picture signals in accordance with the sampling clock (see col. 14, lines 19-32).

Regarding claims 2-4, the filters 42 and 44 inherently enhance the sharpness and contrast of the picture by reducing the unwanted signals or noise.

Regarding claim 6, see rejection to claim 1.

Regarding claim 7, Laub further includes a displaying means.

Regarding claim 8, see rejection to claim 1.

Regarding claim 10, see rejection to claim 1.

Allowable Subject Matter

6. Claim 5 is allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: Prior art does not specify the step of processing the analog picture signal in dependence on the quality indication, and wherein quality indication is the bit-rate and/or the compression ratio and/or the quantization level and/or other information about the encoding or decoding as claimed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Lee whose telephone number 571-272-7349. The examiner can normally be reached on Monday through Thursday from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Ometz, can be reached on 571-272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
